DETAILED ACTION

This action has two restriction requirements, as follows:

First Restriction Requirement

1. Restriction to one of the following inventions (numbered with Roman numerals) is required under 35 U.S.C. 121:

Ir1. Claims 1-23, drawn to an ophthalmic lens that has a dielectric mirror, classified in class 351, subclass 163.

IIr1. a) Claims 24-27, 29-31, 34-38 and 40, drawn to a lens that includes a rugate filter, classified in class 359, subclass 890 or class 351, subclass 44 and to an ophthalmic lens including a rugate filter, classified in class 351, subclass 44 or 163.

b) Claims 28, 32, 33, and 39, drawn to a lens that includes both a dielectric mirror and a rugate filter, classified in class 359, subclass 890 or class 351, subclass 44.

2. Inventions Ir1 and IIr1(a) are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Ir1 has separate utility such as a sunglass lens having the filtering properties shown in Fig. 2. See MPEP § 806.05(d).

3. Inventions Ir1 and IIr1(b) are related as subcombination and combination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not

Art Unit: 2873

require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claims 28 and 39, for example, do not have the particulars of the dielectric mirror (such as those recited in claims 5 and 6) and other particulars of the lens having a dielectric mirror and no rugate filter. The subcombination has separate utility such as a sunglass lens having the filtering properties shown in Fig. 2.

4. Because these inventions are distinct for the reasons given above and the search required for Invention IIr1 is not required for Invention Ir1, restriction for examination purposes as indicated is proper.

Second Restriction Requirement

5. If Invention Ir1 of the first restriction requirement above was elected, restriction to one of the following inventions is required under 35 U.S.C. 121:

Ir1:Ir2. The part of Markush Claim 2 and its dependent claims 3, 4, and 7, and claims 9-16, drawn to an ophthalmic lens that is tinted with blue-blocking amber tint, classified in class 351, subclass 163.

Ir1:IIr2. The part of Markush Claim 2 and its dependent claims 3, 4, and 7, and claims 8, 17-23, drawn to an ophthalmic lens that is tinted with color-discriminating grey tint, classified in class 351, subclass 163.

Art Unit: 2873

The rest of the claims of Invention Ir1 will be examined with either elected invention of this second restriction requirement.

6. The inventions are distinct, each from the other because of the following reasons:

Inventions Ir1:Ir2 and Ir1:IIr2 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions Ir1:Ir2 and Ir1:IIr2 (and the respective tints) are not disclosed or claimed to be usable together and give rise to different spectra, as shown in the figures (the spectrum of Ir1:Ir2 is shown in Fig. 4 and the spectrum of Ir1:IIr2 is shown in Fig. 2).

7. Claim 1 links inventions Ir1:Ir2 and Ir1:IIr2. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 1. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable.

Art Unit: 2873

In re Ziegler, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

8. If Invention IIr1 of the first restriction requirement above was elected, restriction to one of the following inventions is required under 35 U.S.C. 121:

IIr1:Ir2. The part of Markush claims 29 and 40, and claim 35, drawn to an ophthalmic lens that is tinted with blue-blocking amber tint, classified in class 351, subclass 163.

IIr1:IIr2. The part of Markush claims 29 and 40, and claim 34, drawn to an ophthalmic lens that is tinted with color-discriminating grey tint, classified in class 351, subclass 163.

The rest of the claims of Invention IIr1 will be examined with either elected invention of this second restriction requirement.

9. The inventions are distinct, each from the other because of the following reasons: Inventions IIr1:Ir2 and IIr1:IIr2 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions IIr1:Ir2 and IIr1:IIr2 (and the respective tints) are not disclosed or claimed to be usable together and would give rise to different spectra.

Art Unit: 2873

10. Claims 24-26 and 38 link inventions IIr1:Ir2 and IIr1:IIr2. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 24-26 and 38. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Conclusion

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
